Top Skills

LLM Engineering
Algorithmic Trading
Price Forecasting

Languages

Persian (Native or Bilingual)
French (Full Professional)
English (Full Professional)

Certifications

AI Coder: Complete Claude Code &
Coding Agents Course
LLM Engineering: Master AI, Large
Language Models & Agents
AI Builder: Create Agents, Voice
Agents & Automations in n8n
The Complete Agentic AI
Engineering Course

Honors-Awards

Recipient of Grant and Membership
for Outstanding Academic Success
Gole medalist in National Olympiad
in Informatics

Behrad Zabihi

Data Scientist | MSc Data Science
Manchester Area, United Kingdom

Summary

I am a Data Scientist with a strong background in machine learning, deep learning, and statistical modelling. With an MSc in Data Science (Top 2.5%) and a Computer Engineering degree, I specialise in building intelligent systems that extract insights from complex data. My expertise spans NLP and computer vision, where I leverage advanced algorithms to drive meaningful outcomes.

Beyond data science, I have hands-on experience in software engineering, developing cloud-based applications and scalable AI solutions. My approach combines analytical rigor with practical implementation, ensuring that models are not only accurate but also efficient and deployable in real-world environments.

I am passionate about continuous learning and applying cutting-edge research to solve real-world challenges at the intersection of AI and business.

Experience

bet365
Data Scientist
February 2026 - Present (5 months)
Manchester, England, United Kingdom

Informed Solutions

Data Scientist
November 2023 - November 2025 (2 years 1 month)
Greater Manchester, England, United Kingdom

- Automated Scottish farmers' funding validation with a multimodal ML pipeline deployed on AWS (Llama, LLaVA, Bedrock, Textract), cutting review time from 2 weeks to real-time and achieving an F1 score of 0.91.
- Built a scalable ETL pipeline using Airbyte and DBT to extract and link EPC and postcode data for 65,000 households in the Isle of Wight, powering an interactive map for household-level EPC insights.

- Developed cloud-native web apps and REST APIs to support scalable, data-driven public services.
- Built a Power BI dashboard enabling real-time data-driven decisions for delivery managers and recruiters.
- Communicated complex AI/ML concepts to both technical and non-technical stakeholders.
- Managed CI/CD pipelines and automated testing using Git and Jira in agile cross-functional teams.

Informed Solutions

Data Scientist

June 2023 - September 2023 (4 months)

Manchester, England, United Kingdom

- Developed an NLP pipeline for keyword extraction and summarisation of structured and unstructured data.
- Improved topic extraction using BERTopic and LLM-based techniques.
- Used GPT and LangChain to summarise urban planning cases, cutting manual review time by 60% and reaching a BERTScore F1 of 0.84.

Mizan Gostaran Sharif

Data Scientist

June 2022 - August 2022 (3 months)

Tehran, Iran

- Scaled resume parsing system from 26K to 500K+ CVs using a custom NLP pipeline for entity extraction.
- Improved job recommendation by clustering unstructured CVs using UMAP + HDBSCAN for semantic similarity analysis.

Aryamehr University of Technology

Research Assistant

February 2021 - July 2021 (6 months)

Tehran, Iran

- Modelled Covid-19 propagation network using time series and statistical modelling on 100k global cases.
- Identified key influencers in the global propagation graph by inferring inter-country transmission rates.

Education

Lancaster University

Master of Science, Data Science and Statistics · (October 2022 - September 2023)

Aryamehr University of Technology

Bachelor of Science, Computer Engineering · (September 2016 - July 2021)
